Alex Morgan [DEMO DATA]

Seattle, WA | alex.morgan.demo@example.com | (555) 019-2834 | github.com/alexmorgan-demo | linkedin.com/in/alexmorgan-demo

EDUCATION

University of Washington — Bachelor of Science in Computer Science | 2021 – 2025

Relevant Coursework: Algorithms & Data Structures, Machine Learning, Database Systems, Computer Systems.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, JavaScript, HTML, CSS
Machine Learning & AI: TensorFlow, Scikit-learn, Computer Vision, OpenCV, Pandas, NumPy, Statistics
Developer Tools: Git, GitHub, Linux, VS Code, Jupyter Notebooks

WORK EXPERIENCE

AI Research Intern | DataPulse Analytics — Seattle, WA | June 2024 – September 2024

- Engineered data preprocessing and feature extraction pipelines in Python and Pandas across 2.5M records.
- Trained and tuned gradient boosting and random forest models using Scikit-learn, improving baseline precision by 14%.
- Collaborated with senior engineers on benchmarking inference times across internal server clusters.

KEY PROJECTS

Autonomous Object Detection System | TensorFlow, OpenCV, Python

- Built a multi-class object detection pipeline in TensorFlow and OpenCV for live video streaming.
- Processed video feeds at 32 frames per second with mean average precision (mAP) of 0.81.

URL Phishing & Security Classifier | Scikit-learn, Python, Pandas

- Developed an automated cybersecurity feature classification pipeline analyzing URL lexical heuristics.
- Achieved 94.2% accuracy across a public benchmark dataset of 80,000 URLs with SHAP explainability.
